Welcome to our office!

In a few moments, I'll get to meet you and discover how we may be able to help you with safe and natural chiropractic care. Until then, by completing the brief paperwork that follows, I'll be able to learn what's brought you to our office and how I we might be able to help you.

Since I'm going to ask you some personal information, it's only fair that I reveal some information about myself!

I was introduced to chiropractic in 1976 after I was in a car accident. I had tried traditional approaches to resolve my constant headaches and it wasn't until I visited a chiropractor that I got relief. That inspired me to change careers and become a chiropractor.

While at chiropractic college I met the smartest, most beautiful woman in the world and we got married in 1980. Soon after, we were blessed with two children, both boys, who have never had a vaccination, antibiotic or even an aspirin! (If that sounds interesting, I'd love to discuss it with you.)

All these years later, I still see my own chiropractor about twice a month. So does every member of my family. It keeps our nervous systems interference-free, our immune systems strong and we don't seem to get the bugs that go around. (In fact, I haven't even had a cold since 1999!)

Thanks for visiting with us today. I look forward to meeting you and seeing how we can help you achieve your individual health goals.

Welcome!
